TRENDS IN GENETICS REFERENCE EDITION

Volume 5 1989

# CONTENTS

## JANUARY

MONITOR

Why isn't a mouse more like a man? *by Robert P. Erickson* 1

TECHNICAL TIPS 3

PERSPECTIVES

Might gene conversion be the mechanism of somatic hypermutation in mammalian immunoglobulin genes? *by Nancy Maizels* 4

REVIEWS

Mitochondrial DNA mutations and neuromuscular disease, *by Douglas C. Wallace* 9
Regulatory genes in *Aspergillus nidulans, by Meryl A. Davis and Michael J. Hynes* 14
Interferons in cell growth and development, *by Giovanna Romeo, Gianna Fiorucci and Giovanni B. Rossi* 19
Towards the molecular biology of cell adhesion in *Drosophila, by M. Sémériva, C. Naidet, E. Krejci and D. Gratecos* 24

BOOK REVIEWS

Genetic Engineering: An Introduction to Gene Analysis and Exploitation in Eukaryotes (S.M. Kingsman and A.J. Kingsman), *by Peter W. Piper* 29
The Recombination of Genetic Material (K. Brooks Low, ed.), *by Stephen C. West* 29
The Eukaryotic Genome in Development and Evolution (B. John and G. Miklos), *by Gabby Dover* 30
Developmental Biology (2nd edn) (Scott F. Gilbert), *by Alfonso Martinez Arias* 31
Nucleic Acids and Molecular Biology (Vol. 2) (F. Erickson and D. Lilley, eds), *by Horace R. Drew* 32
Protein Transfer and Organelle Biogenesis (R.C. Das and P.W. Robbins, eds), *by John Davey* 33
Mapping and Sequencing the Human Genome (National Research Council Committee), *by Anna-Maria Frischauf* 34

## FEBRUARY

MONITOR

Understanding the molecular mechanism by which methylation influences gene expression, *by William S. Dynan* 35
How do different transcription factors binding the same DNA sequence sort out their jobs? *by Walter Schaffner* 37
RNA splicing in yeast mitochondria: taking out the twists, *by L.A. Grivell and R.J. Schweyen* 39

TECHNICAL TIPS 41

PERSPECTIVES

Chromosome error propagation and cancer, *by Robin Holliday* 42

REVIEWS

Somaclonal variation – genetic basis and breeding applications, *by David A. Evans* 46
Embryonic induction and muscle gene activation, *by J.B. Gurdon, T.J. Mohun, C.R. Sharpe and M.V. Taylor* 51
Strategies for virus resistance in plants, *by David Baulcombe* 56

BOOK REVIEWS

Mitochondrial Biogenesis (C.J. Leaver and D.M. Lonsdale, eds), *by Phillip Nagley* 61
Heterochromatin – Molecular and Structural Aspects (Ram S. Verma, ed.), *by Ken Jones* 62
Experiments in Animal Development (Robert W. Merriam), *by J.B. Gurdon* 63

## MARCH

### MONITOR

Complexities of gene regulation by cAMP, *by Michael Karin* 65
Trafficking in small mitochondrial RNA molecules, *by Phillip Nagley* 67

### REVIEWS

The new mouse genetics: altering the genome by gene targeting, *by Mario R. Capecchi* 70
Geminivirus genes and vectors, *by Jeffrey W. Davies and John Stanley* 77
Maps of linkage and synteny homologies between mouse and man, *by Joseph H. Nadeau* 82
Genetic dissection of the early stages of protein secretion in yeast, *by Raymond J. Deshaies, François Kepes and Peter C. Böhni* 87

### BOOK REVIEWS

Introduction to Practical Molecular Biology (P. Darbre), *by Christopher Howe* 94
The Genetic Jigsaw: A Story of the New Genetics (R. McKie), *by P.N. Goodfellow* 94
Developmental Biology: A Comprehensive Synthesis (Vol. 5) (L.W. Browder, ed.), *by J.B. Gurdon* 95
The Prevention and Avoidance of Genetic Disease (J.H. Edwards, M.F. Lyon and E.M. Southern, eds), *by Charles R. Scriver* 96

## APRIL

### MONITOR

Regulatory mechanisms of the papillomaviruses, *by P. Ward, D.V. Coleman and A.D.B. Malcolm* 97
Slips, strings and species, *by Gabriel A. Dover* 100

### REVIEWS

Eukaryotic transposable elements and genome evolution, *by David J. Finnegan* 103
Platelet-derived growth factor: three isoforms and two receptor types, *by Carl-Henrik Heldin and Bengt Westermark* 108
'Nuclear' oncogenes convert extracellular stimuli into changes in the genetic program, *by Peter Herrlich and Helmut Ponta* 112
Mouse mutants provide new insights into the role of extracellular matrix in cell migration and differentiation, *by Kathleen Morrison-Graham and James A. Weston* 116
Common mechanisms of promoter recognition by RNA polymerases II and III, *by Shona Murphy, Beth Moorefield and Tomas Pieler* 122

### BOOK REVIEWS

Regulation of Enzyme Activity (J.H. Ottaway), *by Tim Hunt* 127
An Introduction to Recombinant DNA Techniques: Basic Experiments in Gene Manipulation (P. Hackett, J. Fuchs and J. Messing), *by Steve Busby* 127
Aneuploidy Part B: Induction and Test Systems (Progress and Topics in Cytogenetics Vol. 7B) (B.K. Vig and A.A. Sandberg, eds), *by Ann C. Chandley* 128
Proceedings of the 2nd International Conference on Quantitative Genetics (B.S. Weir, E.J. Eisen, M.M. Goodman and G. Namkoong, eds), *by Michael Bulmer* 128

## MAY

### MONITOR

An update on the vertebrate homeobox, *by Gregory R. Dressler* 129
Autoregulation – a common property of eukaryotic transcription factors? *by Edgar Serfling* 131
Eukaryotic chromosome replication requires both α and δ polymerases, *by Julian Blow* 134

### TECHNICAL TIPS

137

### REVIEWS

The Great GATC: DNA methylation in *E. coli, by Frederic Barras and M.G. Marinus* 139
Mammalian chromosome banding – an expression of genome organization, *by Wendy A. Bickmore and Adrian T. Sumner* 144
Mitochondrial RNA polymerase: dual role in transcription and replication, *by Alfred H. Schinkel and Henk F. Tabak* 149
The molecular biology of hepatitis B virus, *by Hubert E. Blum, Wolfgang Gerok and Girish N. Vyas* 154

## Book Reviews

Cellular Oncogene Activation (G. Klein, ed.), *by Tony Pawson* 159
Yeast: A Practical Approach (I. Campbell and J.H. Duffus, eds), *by A.J.P. Brown* 159
Topobiology: an Introduction to Molecular Embryology (G.E. Edelman), *by Rosa Beddington* 160
Ubiquitin (M. Rechsteiner, ed.), *by Philip G. Board* 161
Genetics of Resistance to Bacterial and Parasitic Infection (D. Wakelin and J.M. Blackwell, eds), *by Donald L. Wassom* 162
The T-Cell Receptors (T.W. Mak, ed.), *by W. Born* 162
Working with Animal Chromosomes (2nd edn) (H. Macgregor and J. Varley)
Chromosome Structure and Function – Impact of New Concepts (J.P. Gustafson and R. Appels, eds), *by H. John Evans* 163

# June

## Monitor

Positional signalling: where are we now? *by Jim Smith* 165
Mitosis comes apart, *by Julian Blow* 166
Group I introns: do they only go home? *by Claudio Scazzocchio* 168

## Letters

Past imperfect, *by J.A. Gally (with reply by Nancy Maizels)* 172
Are intron-encoded specific endonucleases responsible for nonhomologous recombination? *by France Koll and Léon Belcour* 173

## Perspectives

Cellular 'neoteny': a possible developmental basis for chromaffin cell plasticity, *by David J. Anderson* 174

## Technical Focus

The polymerase chain reaction, *by Thomas J. White, Norman Arnheim and Henry A. Erlich* 185

***Centre-page diagram: The polymerase chain reaction*** 179–184

## Reviews

The *Drosophila zeste* gene and transvection, *by Chao-ting Wu and Michael L. Goldberg* 189

## Book Reviews

Cold Spring Harbor Symposium on Quantitative Biology (Vol. 52), *by John Rogers* 195
The Heritage of Experimental Embryology: Hans Spemann and the Organiser (V. Hamburger), *by Jonathan Cooke* 196
Genetic Recombination (R. Kucherlapati and G.R. Smith, eds), *by Neville Symonds* 197
Genetic Engineering (J.G. Williams and R.K. Patient), *by Peter Little* 198

# July

## Monitor

A nod at differentiation: the *nodD* gene product and initiation of *Rhizobium* nodulation, *by Barbara A.T. Winsor* 199

## Letters

A phytophile responds . . . *by Jonathan Jones* 202

## Technical Tips 202

## Perspectives

*Trans* splicing in trypanosomes – archaism or adaptation? *by Peter W. Laird* 204

## Reviews

Bacteriophage introns: parasites within parasites? *by Marlene Belfort* 209
How were introns inserted into nuclear genes? *by John H. Rogers* 213
Progress towards identifying the neurofibromatosis (NF1) gene, *by Francis S. Collins, Peter O'Connell, Bruce A.J. Ponder and Bernd R. Seizinger* 217
Hereditary disorders of the red cell membrane skeleton, *by Kevin A. Davies and Samuel E. Lux* 222

## Book Reviews

Four Billion Years: an Essay on the Evolution of Genes and Organisms (W.F. Loomis), *by Gabby Dover* 228
Human Heredity, Principles and Issues (M.R. Cummings), *by Frederick Hecht* 229
Advances in Human Genetics (H. Harris and K. Hirschhorn, eds), *by Peter N. Goodfellow* 230
Male Sterility in Higher Plants (Monographs on Theoretical and Applied Genetics, Vol. 10) (M.L.H. Kaul), *by H.G. Dickinson* 230
Bacterial and Bacteriophage Genetics (An Introduction) (2nd edn) (E.A. Birge), *by David Sherratt* 231
Duchenne Muscular Dystrophy (Oxford Monographs on Medical Genetics, Vol. 15) (revised edn) (A.E.H. Emery), *by Louis M. Kunkel, Eric P. Hoffman and Alan H. Beggs* 232

**August**

# The cellular and molecular basis of development ~a special issue~

## Introduction

The primacy of cell interactions in development, *by J. Gerhart* 233

## Reviews

Cell–cell interactions that specify certain cell fates in *C. elegans* development, *by Iva Greenwald* 237
Cell–cell interactions in *Dictyostelium* development, *by Peter Devreotes* 242
Retinoids and vertebrate limb pattern formation, *by Gregor Eichele* 246
Genesis of the *Drosophila* peripheral nervous system, *by Alain Ghysen and Christine Dambly-Chaudière* 251
Genetic control of flower development, *by Gary N. Drews and Robert B. Goldberg* 256
A cellular basis for pattern formation in the insect epidermis, *by Alfonso Martinez Arias* 262
How fixed is the differentiated state? *by Helen M. Blau* 268
Genetic mosaics and cell lineage analysis in plants, *by Scott Poethig* 273
Towards a molecular-genetic analysis of mammalian development, *by Janet Rossant and Alexandra L. Joyner* 277
Genetics and early development of zebrafish, *by Charles B. Kimmel* 283

**September**

## Monitor

Chromosome crawling in the MHC, *by John Bell* 289

## Letters

*Aspergillus* and mouse share a new class of 'zinc finger' protein, *by Herbert N. Arst, Jr, Bernard Kudla, Nilce Martinez-Rossi, Mark X. Caddick, Sue Sibley and R. Wayne Davies* 291
Cell staining with DAPI: alive? *by Annette W. Coleman*
... or dead? *by D. Volf and R. Jurecić*
... or a bit of both? *by Judith Fantes* 292

## Technical Tips 293

## Reviews

The evolutionary origin of organelles, *by Michael W. Gray* 294
The major histocompatibility complex in the chicken, *by François Guillemot, James F. Kaufman, Karsten Skjoedt and Charles Auffray* 300
Site-specific recombination by Tn*3* resolvase, *by W. Marshall Stark, Martin R. Boocock and David J. Sherratt* 304
Unusual kinetochores and chromatin diminution in *Parascaris, by Sergio Pimpinelli and Clara Goday* 310

## Book Reviews

Plant Molecular Biology (2nd edn) (D. Grierson and S. Covey), *by Alison G. Smith* 316
Genes and Gene Regulation (New Studies in Biology) (N. MacLean), *by Robin Hesketh* 316
Textbook of Human Genetics (Max Levitan), *by Kay Davies* 317

## OCTOBER

COMMENT

The *E. coli* dnaA initiation protein: a protein for all seasons, *by Costa Georgopoulos* 319

MONITOR 322

TECHNICAL TIPS 325

PERSPECTIVES

Human telomeres: fusion and interstitial sites, *by Nicholas D. Hastie and Robin C. Allshire* 326

REVIEWS

Genomic imprinting and genetic disorders in man, *by Wolf Reik* 331
Chromosomes of malaria parasites, *by Simon J. Foote and David J. Kemp* 337
Fine-tuning of MHC class II gene expression in defined microenvironments, *by Hans-Jörg Fehling, Stéphane Viville, Willem van Ewijk, Chrisophe Benoist and Diane Mathis* 342

BOOK REVIEWS

Genetics of Bacterial Diversity (D.A. Hopwood and K.F. Chater, eds), *by John Beckwith* 348
Principles of Population Genetics (2nd edn) (D.L. Hartl and A.G. Clark), *by Jody Hey* 349
Evolutionary Genetics (J. Maynard Smith), *by Montgomery Slatkin* 349
The Foundations of Human Genetics (K.R. Dronamraju), *by Alan Emery* 350
Plant Molecular Biology, A Practical Approach (C.H. Shaw, ed.), *by Harry J. Klee* 351
Applications of Plant Cell and Tissue Culture (CIBA Foundation Symposium 137) (G. Bock and J. Marsh, eds), *by Oluf L. Gamborg* 352
Anti-sense RNA and DNA (D.A. Melton, ed.), *by David C. Baulcombe* 352
Antibodies – A Practical Approach (Vols 1 and 2) (D. Catty, ed.), *by Peter Robinson* 353

## NOVEMBER

COMMENT

Untwisting B–Z DNA, *by Robin Holliday* 355
Molecular biology of viral and nonviral retroelements, *by Roger Hull and Hans Will* 357
Happy Union Generates Order? *by Peter Goodfellow* 360
Huge Undertaking – Goal: Ourselves, *by Alison Stewart* 361

MONITOR 363

TECHNICAL TIPS 366

REVIEWS

Hypervariable minisatellites: recombinators or innocent bystanders? *by Andrew P. Jarman and Richard A. Wells* 367
Multilevel regulation of *Streptomyces* differentiation, *by Keith F. Chater* 372
Transcription factors and the control of *Drosophila* development, *by Mark D. Biggin and Robert Tjian* 377

BOOK REVIEWS

Genetic Analysis of Tumor Suppression (Ciba Foundation Symposium 142) (G. Bock and J. Marsh, eds), *by Noel P. Bouck* 384
Practical Isozyme Genetics (Ellis Horwood Series in Gene Technology) (N. Pasteur, G. Pasteur, F. Bonhomme, J. Catalan and J. Britton-Davidian; translated by M. Cobb), *by Kirsten Fischer Lindahl* 384
Organelles (Macmillan Molecular Biology Series) (M. Carroll), *by Christopher Howe* 385
The Division and Segregation of Organelles (Society for Experimental Biology Seminar Series 35) (S.A. Boffey and D. Lloyd, eds), *by C. William Birky, Jr* 385
Gene Structure and Transcription (T. Beebee and J. Burke), *by Peter Goldfarb* 386
Is Science Necessary? (M. Perutz), *by Jan Witkowski* 387
Molecular and Cell Biology of Yeasts (E.F. Walton and G.T. Yarranton, eds), *by Linda Breeden* 388

# DECEMBER

## COMMENT

Pseudogenes, chimaeric genes and the timing of antigen variation in African trypanosomes, *by Etienne Pays* 389

## TECHNICAL TIPS 391

## MONITOR 392

## REVIEWS

Immunoglobulin gene transcription: molecular mechanisms, *by Kathryn L. Calame* 395

The egg came first, of course! Anterior–posterior pattern formation in *Drosophila* embryogenesis and oogenesis, *by Lynn J. Manseau and Trudi Schüpbach* 400

The mammalian pseudoautosomal region, *by N. Ellis and P.N. Goodfellow* 406

The $\alpha_1$-antitrypsin gene and its deficiency states, *by Ronald G. Crystal* 411

## BOOK REVIEWS

Mechanisms of Segmentation (*Development* Suppl. 104) (V. French, P.W. Ingham, J. Cooke and J. Smith, eds), *by J.R.S. Whittle* 418

Sex and Death in Protozoa (the History of an Obsession) (G. Bell), *by D. Ammermann* 419

Computational Molecular Biology. Sources and Methods for Sequence Analysis (A.M. Lesk, ed.) Biomolecular Data. A Resource in Transition (R.R. Colwell, ed.), *by Joe Felsenstein* 419

Molecular Biology of the Cell (2nd edn) (B. Alberts, D. Bray, J. Lewis, M. Raff, K. Roberts and J.D. Watson, eds)

Molecular Biology of the Cell – The Problems Book (J. Wilson and T. Hunt), *by Alfonso Martinez Arias* 420
